

Nabeel Ahmed

Islamabad, Pakistan | (+92) 315 0574960 | nabeelahmed44m@gmail.com | [LinkedIn](#) | [GitHub](#)

KEY SKILLS

- **Languages:** JavaScript, Python, HTML, CSS, C, C++
- **Frameworks & Libraries:** Django, Flask, FastAPI, FlaskAPI, PyTorch, TensorFlow, Scrapy, React.js, Next.js, Vue.js, Tailwind CSS
- **Backend:** Node.js, Express.js, NestJs, GraphQL, Redis, Serverless Architecture
- **Cloud Platforms:** AWS, GCP, Azure
- **Databases:** SQL, MongoDB
- **Testing Tools:** Pytest, Unit test, K6, JMeter, Jest, AWS Distributed Load Testing
- **DevOps:** Git/GitHub, CI/CD Pipelines, IAC

EDUCATION

- **Bahria University, Islamabad** Islamabad, Pakistan
Bachelor of Science in Computer Science

EXPERIENCE

- **Devsinc** Islamabad, Pakistan
Associate Software Engg *June 2025 – Present*
 - **Enterprise Application Development:** Developing and maintaining large-scale web applications using Django, Flask, and React.js for enterprise clients, ensuring performance and scalability.
 - **Microservices API Design:** Architecting and managing microservices and RESTful APIs, enabling seamless integration across distributed systems.
 - **Cloud Deployment:** Deploying applications on AWS (EC2, Lambda, S3, RDS) with CI/CD pipelines, improving deployment speed and reliability.
 - **Database Optimization:** Optimizing PostgreSQL and MySQL databases through indexing and query tuning, reducing query execution times by up to 40%.
 - **Mentorship Collaboration:** Mentoring junior developers, leading code reviews, and enforcing best practices in Git, CI/CD, and Agile workflows.
 - **Testing & Quality Assurance:** Designing and implementing automated test suites using Pytest and Unittest, conducting performance/load testing with K6, JMeter, and AWS Distributed Load Testing, and ensuring high code reliability and maintainability.
- **Agile Tribe Pvt Ltd** Islamabad, Pakistan
Full Stack & Python Developer *March 2023 – June 2025*
 - **Full Stack Web Application Development:** Developed and maintained full-stack applications using Django/Flask (backend) and React.js (frontend), ensuring responsive and scalable design.
 - **API Development and Integration:** Designed and implemented RESTful APIs in Python, integrating third-party services and enhancing system functionality.
 - **Security Implementation:** Implemented OAuth2 and JWT-based authentication, strengthening application security.
 - **Testing and QA:** Wrote unit and integration tests using Pytest and Selenium, reducing bugs in production and improving stability.

PROFESSIONAL PROJECTS

- **Leverage Labs - Data-Driven Marketing Platform**
 - Engineered a data-driven marketing platform using Node.js and React.js.
 - Integrated advanced analytics to optimize audience segmentation and campaign outcomes.
- **Klar - Fintech Platform**
 - Developed a secure fintech platform using the MERN stack (MongoDB, Express.js, React.js, Node.js).
 - Ensured seamless payment processing and fraud detection to improve transaction reliability.
